

Alexandru Turcanu

Patient Health Summary, generated on Jun. 05, 2026

Patient Demographics - Male; born Aug. 08, 2001

Patient Address	Patient Name	Communication
	Alexandru Turcanu	(Mobile) pondorasti@gmail.com
Language	Race / Ethnicity	Marital Status
English - Spoken (Preferred) English - Written (Preferred)	White / Not Hispanic or Latino	Unknown

Note from Kaiser Permanente Northern California

This document contains information that was shared with Alexandru Turcanu. It may not contain the entire record from Kaiser Permanente Northern California.

Allergies

Dust (Sneezing) - Low Criticality

Medications

Mesalamine (CANASA) 1,000 mg Rect Supp (Started 3/30/2023)

Unwrap and insert 1 Suppository rectally daily at bedtime

Mesalamine (CANASA) 1,000 mg Rect Supp (Started 4/25/2023)

Unwrap and insert 1 Suppository rectally daily at bedtime

Active Problems

Problem	Noted Date	Diagnosed Date
VITAMIN D DEFICIENCY	04/27/2023	
MITRAL VALVE DISORDER	01/17/2023	
IRRITABLE BOWEL SYNDROME	01/17/2023	

Immunizations

COVID-19 PFizer-BioNtech 12yrs-adult, external administration (Given 1/3/2022, 4/10/2021, 3/20/2021)

COVID-19 mRNA LNP-S, PF, (2023-2024) 12YRS-Adult(Pfizer), 30mcg/0.3mL (Given 11/22/2023)

COVID-19 mRNA LNP-S, bivalent PF 12yrs-adult (Pfizer), 30mcg/0.3mL (Given 5/19/2023)

HAV-HBV (Hepatitis A and B) (Given 3/20/2024, 11/22/2023, 5/19/2023)

HBV (Hepatitis B) (Given 2/13/2002, 10/10/2001, 8/8/2001)

HPV9 (Human Papillomavirus) 9 valent (Given 8/4/2023, 4/5/2023, 1/17/2023)

INFS Pres Free 6mos-Adult (Flulaval Quadrivalent) (Influenza) (Given 1/17/2023)

INFS pres free 6mos-adult (Fluzone quadrivalent) (influenza) (Given 11/22/2023)

MENps (MENOMUNE) (Meningococcal polysaccharide) (Given 10/8/2020)

MMR (Measles, Mumps, Rubella) (Given 7/12/2008, 8/20/2002)

Tdap (Tetanus, diphtheria, acellular pertussis) (Given 9/10/2020, 10/10/2001)

VAR (Varicella, chickenpox) (Given 10/8/2020)

Social History

Tobacco Use	Types	Packs/Day	Years Used	Date
Smoking Tobacco: Never				
Smokeless Tobacco: Never				

Tobacco Cessation: Counseling Given: Not Answered

Sex and Gender Information	Value	Date Recorded
Sex Assigned at Birth	Not on file	
Legal Sex	Male	11/16/2022 12:43 AM PST
Gender Identity	Not on file	
Sexual Orientation	Not on file	

Last Filed Vital Signs

Vital Sign	Reading	Time Taken	Comments
Blood Pressure	117/68	02/01/2024 9:19 AM PST	
Pulse	90	02/01/2024 9:19 AM PST	
Temperature	36.7 °C (98 °F)	02/01/2024 9:19 AM PST	
Respiratory Rate	-	-	
Oxygen Saturation	96%	01/17/2023 12:12 PM PST	
Inhaled Oxygen Concentration	-	-	
Weight	48.2 kg (106 lb 3.2 oz)	02/01/2024 9:19 AM PST	
Height	179.1 cm (5' 10.5")	02/01/2024 9:19 AM PST	
Body Mass Index	15.02	02/01/2024 9:19 AM PST	

FASTING LIPID PANEL (LIPID PANEL, (CHOL, DHDL, TRIG, CALC LDL), FASTING) - Final result (02/01/2024 9:09 AM PST)

Specimen (Source)	Anatomical Location / Laterality	Collection Method / Volume	Collection Time	Received Time
			02/01/2024 9:09 AM PST	02/01/2024 12:13 PM PST
Narrative				
Authorizing Provider	Result Type	Result Status		
ALAN WAIHUNG LEUNG MD	BLOOD	Final Result		
Performing Organization	Address	City/State/ZIP Code	Phone Number	
TPMG REGIONAL LABORATORY, MWS	914 Marina Way South	Richmond, CA 94804		

SPECIFIC IMMUNOGLOBULIN E (IGE, SPECIFIC) - Final result (02/01/2024 9:09 AM PST)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
IGE, SPECIFIC INTERPRETATION.	SEE NOTE				TPMG REGIONAL LABORATORY, BERKELEY	
Comment: An IgE result less than 0.10 kU/L is considered undetectable. Clinical correlation advised. An IgE result greater than 0.10 kU/L is considered detectable. Clinical correlation advised.						

Specimen (Source)	Anatomical Location / Laterality	Collection Method / Volume	Collection Time	Received Time

VITAMIN D (VITAMIN D, 25-HYDROXY) - Final result (02/01/2024 9:09 AM PST)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
25-HYDROXYVITAMIN D2+D3, IA	43	20 - 79 ng/mL			TPMG REGIONAL LABORATORY, MWS	

Comment:
Interpretation of 25-OH vitamin D Levels (ng/mL):

Deficient	<12
Insufficient	12-19
Sufficient	20-79
Risk of toxicity	>/= 80

Reference intervals and interpretive guidelines represent clinical decision points for healthy adults. Definitive data is lacking for the pediatric age group. Test performed by immunoassay on Siemens Atellica effective Nov 1, 2023. values obtained with different vitamin D assays cannot be used interchangeably.

STOOL (FECES) BACTERIAL GASTROINTESTINAL PATHOGEN PANEL (BACTERIAL ENTERIC PATHOGEN PANEL (6 COMPONENTS), STOOL, PCR) - Final result (04/19/2023 9:05 AM PDT)						
Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
ENTERIC PATHOGEN PANEL INTERPRETATION	SEE NOTE				TPMG REGIONAL LABORATORY, BERKELEY	
Comment: The assay detecting E.coli 0157, STX1 and STX2 was developed, and characteristics determined by TPMG Regional Laboratory. See http://lablink.ca.kp.org/cs/ for more information. Enteric Pathogen Panel PCR tests that are positive for Salmonella will be subcultured and sent to Public Health for characterization and investigation. Due to the higher sensitivity of the PCR assay, some PCR positive samples will be culture negative and further evaluation will not be possible. If an organism is culturable, antibiotic susceptibility testing can be performed by request.						
SALMONELLA SPECIES DNA, STOOL, QL, PCR	NEGATIVE	NEGATIVE			TPMG REGIONAL LABORATORY, BERKELEY	

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
SHIGELLA SPECIES DNA, STOOL, QL, PCR	NEGATIVE	NEGATIVE			TPMG REGIONAL LABORATORY, BERKELEY	
CAMPYLOBACTER COLI/ JEJUNI DNA, STOOL, QL, PCR	NEGATIVE	NEGATIVE			TPMG REGIONAL LABORATORY, BERKELEY	
Stx gene, PCR	NEGATIVE	NEGATIVE			TPMG REGIONAL LABORATORY, BERKELEY	
Specimen (Source)	Anatomical Location / Laterality		Collection Method / Volume		Collection Time	Received Time

Performing Organization	Address		City/State/ZIP Code	Phone Number		
TPMG REGIONAL LABORATORY, BERKELEY	1725 Eastshore Highway		Berkeley, CA 94710			
STOOL CALPROTECTIN (CALPROTECTIN, STOOL) - Final result (04/19/2023 9:05 AM PDT)						
Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
CALPROTECTIN, STOOL	1370	<=49 ug/g			ARUP LABORATORIES	

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Comment: REFERENCE INTERVAL: Calprotectin, Fecal by Immunoassay						
Less than 50 ug/g.....Normal						
50-120 ug/g.....Borderline elevated, test should be re-evaluated in 4-6 weeks.						
121 ug/g or greater.....Elevated						
Performed By: ARUP Laboratories

QUANTIFERON TB TESTING (GAMMA INTERFERON (TB), CD4 AND CD8 T-CELL RESPONSE) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
QFT TB GOLD PLUS INTERPRETATION	Negative	Negative			ARUP LABORATORIES	
Comment: Interpretive Data: Quantiferon TB Gold Plus						
Interferon gamma release is measured for specimens from each of the four collection tubes. A qualitative result (Negative, Positive, or Indeterminate) is based on interpretation of the four values, NIL, MITOGEN minus NIL (MITOGEN-NIL), TB1 minus NIL (TB1-NIL), and TB2 minus NIL (TB2-NIL). The NIL value represents nonspecific reactivity produced by the patient specimen. The MITOGEN-NIL value serves as the positive control for the patient specimen, demonstrating successful lymphocyte activity. The TB1-NIL tube specifically detects CD4+ lymphocyte reactivity, specifically stimulated by the TB1 antigens. The TB2-NIL tube detects both CD4+ and CD8+ lymphocyte reactivity, stimulated by TB2 antigens. An overall Negative result does not completely rule out TB infection.						
A false-positive result in the absence of other clinical evidence of TB infection is not uncommon. Refer to: Updated Guidelines for Using Interferon Gamma Release Assays to Detect Mycobacterium tuberculosis Infection --- United States, 2010 (http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5905a1.htm), for more information concerning test performance in low-prevalence populations and use in occupational screening.

TPMT GENOTYPING FOR THIOPURINE DRUG TOXICITY (THIOPURINE DRUG TOXICITY, TPMT, GENOTYPING) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
TMTP gene mutation analysis, PCR	See Below				QUEST DIAGNOSTICS	

Comment:

RESULT: NEGATIVE FOR NO FUNCTION ALLELES (GENOTYPE
TPMT*1/TPMT*1)

INTERPRETATION: Analysis of DNA indicates that this individual does not carry any of the TPMT no function alleles tested. This test cannot rule out the possibility that he or she is a carrier of one or more rare variants causing an intermediate (IM) or poor metabolizer (PM) phenotype.

Laboratory results and submitted clinical information reviewed by Bernard Joseph Ilagan, MD, MHA, DABMGG, CGMBS.

Thiopurine S-methyltransferase (TPMT) is an enzyme involved in the metabolism of drugs such as azathioprine, 6-mercaptopurine, and cisplatin. No function and decreased function alleles in the TPMT gene (NM 000367) cause a reduction of TPMT enzyme activity, which leads to thiopurine drug-related toxicity (myelosuppression) as well as cisplatin-induced ototoxicity.

This test detects the four most common no function alleles: TPMT*2 (c.238G>C, rs1800462), TPMT*3A (c.460G>A, rs1800460/c.719A>G, rs1142345), TPMT*3B (c.460G>A, rs1800460), and TPMT*3C (c.719A>G, rs1142345). In general, a combination of TPMT*1 and a no function allele would exhibit an intermediate metabolizer and a combination of two no function alleles would exhibit a poor metabolizer. Approximately 10% of the African-American and Caucasian populations are

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
intermediate metabolizers and 3.5% are poor metabolizers. Among East Asians, approximately 3.4% are intermediate metabolizers while 0.03% are poor metabolizers. The variants are detected by real-time PCR of the targeted regions of the TPMT gene. If none of the TPMT variants are detected for a chromosome, the reported allele will be TPMT*1, however, this result is only inferred. This test cannot rule out the presence of other alleles that could also cause an intermediate (IM) or poor metabolizer (PM) phenotype. Among Asians and Hispanics, no function variants in NUDT15 are a more common cause of thiopurine drug-related toxicity. This assay does not check for variants in the NUDT15 gene. Although rare, false positive or false negative results may occur. All results should be interpreted in the context of clinical findings, relevant history, and other laboratory data. Additional information regarding the significance of gene-drug interactions can be found in a number of places, including the package insert, FDA websites, the Clinical Pharmacogenetics Implementation Consortium (CPIC), as well as PharmGKB (http://www.pharmgkb.org) and the primary literature. Health care providers may also contact your local Quest Diagnostics' genetic counselor or call 1-866-GENEINFO (866-436-3463) for assistance with the interpretation of these results. This test was developed, and its analytical performance characteristics have been determined by Quest Diagnostics Nichols Institute San Juan Capistrano. It has not been cleared or approved by FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes. Reviewed and signed by Laboratory results and submitted clinical information reviewed by Bernard Joseph Ilagan,MD, MHA, DABMGG, CGMBS, Signed on 04/12/2023 at 15:24 Test Performed at: Quest Diagnostics Nichols Institute 33608 Ortega Highway San Juan Capistrano, CA 92675-2042 Director: I Maramica MD, PhD, MBA

CREATININE AND CALCULATED GLOMERULAR FILTRATION RATE (CREATININE W GFR, CALCULATED) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Creatinine	0.98	<=1.34 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Estimated Glomerular Filtration Rate	>60	>=60 mL/min/1.73 m2			TPMG REGIONAL LABORATORY, MWS	
Comment: Estimated GFR (eGFR) helps us know how the kidneys are working. eGFR is based on the creatinine blood test result, age, sex, and body size. Monitoring eGFR over time helps us understand changes in kidney function. Actual kidney function may be better or worse than the estimated GFR because blood creatinine levels are affected by body make up, diet, hydration, genetics, and more. Multiple eGFR values are used to determine chronic kidney disease (CKD) stages, defined by the following ranges: eGFR 45 - 59 = Stage 3a eGFR 30 - 44 = Stage 3b eGFR 15 - 29 = Stage 4 eGFR under 15 = Stage 5 Values for eGFR before 05/25/2022 will appear in lab results under "Past results".

If you take your Lucy record on a thumb drive to a different doctor, he or she might be able to use his computer to read the file electronically. Your downloaded, machine-readable Personal Health Summary document is in a format called "CDA." If your doctor has a computer that understands CDA, your information is a folder on your thumb drive called **MachineReadable_XDMFormat**. You might need to enter a password before your doctor can use this file.

FASTING LIPID PANEL (LIPID PANEL, (CHOL, DHDL, TRIG, CALC LDL), FASTING) - Final result (02/01/2024 9:09 AM PST)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Cholesterol	129	<=239 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Comment: Reference range 18-150y (mg/dL): Optimal <200, Normal risk 200-239, High risk >239						
Triglyceride, Fasting	51	<=499 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Comment: Reference range 18-150y (mg/dL): Optimal <100, Low risk 100-149, Normal risk 150-199, High risk 200-499, very high risk >499						
HDL	58	>=40 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Comment: Reference range male 18-150y (mg/dL): Low <40, Normal 40-59, Optimal >59						
Low density lipoprotein calculated	61	<=159 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Comment: Reference range 18-150y (mg/dL): Optimal <100, Low risk 100-129, Normal risk 130-159, High risk 160-189, very high risk >189

SPECIFIC IMMUNOGLOBULIN E (IGE, SPECIFIC) - Final result (02/01/2024 9:09 AM PST)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
IGE, SPECIFIC INTERPRETATION.	SEE NOTE				TPMG REGIONAL LABORATORY, BERKELEY	

Comment:

An IgE result less than 0.10 kU/L is considered undetectable. Clinical correlation advised.

An IgE result greater than 0.10 kU/L is considered detectable. Clinical correlation advised.

VITAMIN D (VITAMIN D, 25-HYDROXY) - Final result (02/01/2024 9:09 AM PST)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
25-HYDROXYVITAMIN D2+D3, IA	43	20 - 79 ng/mL			TPMG REGIONAL LABORATORY, MWS	

Comment:
Interpretation of 25-OH vitamin D Levels (ng/mL):

Deficient	<12
Insufficient	12-19
Sufficient	20-79
Risk of toxicity	>/= 80

Reference intervals and interpretive guidelines represent clinical decision points for healthy adults. Definitive data is lacking for the pediatric age group. Test performed by immunoassay on Siemens Atellica effective Nov 1, 2023. values obtained with different vitamin D assays cannot be used interchangeably.

ENTERIC PATHOGEN PANEL INTERPRETATION	SEE NOTE				TPMG REGIONAL LABORATORY, BERKELEY	
Comment: The assay detecting E.coli 0157, STX1 and STX2 was developed, and characteristics determined by TPMG Regional Laboratory. See http://lablink.ca.kp.org/cs/ for more information. Enteric Pathogen Panel PCR tests that are positive for salmonella will be subcultured and sent to Public Health for characterization and investigation. Due to the higher sensitivity of the PCR assay, some PCR positive samples will be culture negative and further evaluation will not be possible. If an organism is culturable, antibiotic susceptibility testing can be performed by request.

QUANTIFERON TB TESTING (GAMMA INTERFERON (TB), CD4 AND CD8 T-CELL RESPONSE) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
QFT TB GOLD PLUS INTERPRETATION	Negative	Negative			ARUP LABORATORIES	
Comment: Interpretive Data: Quantiferon TB Gold Plus						
Interferon gamma release is measured for specimens from each of the four collection tubes. A qualitative result (Negative, Positive, or Indeterminate) is based on interpretation of the four values, NIL, MITOGEN minus NIL (MITOGEN-NIL), TB1 minus NIL (TB1-NIL), and TB2 minus NIL (TB2-NIL). The NIL value represents nonspecific reactivity produced by the patient specimen. The MITOGEN-NIL value serves as the positive control for the patient specimen, demonstrating successful lymphocyte activity. The TB1-NIL tube specifically detects CD4+ lymphocyte reactivity, specifically stimulated by the TB1 antigens. The TB2-NIL tube detects both CD4+ and CD8+ lymphocyte reactivity, stimulated by TB2 antigens. An overall Negative result does not completely rule out TB infection.						
A false-positive result in the absence of other clinical evidence of TB infection is not uncommon. Refer to: Updated Guidelines for Using Interferon Gamma Release Assays to Detect Mycobacterium tuberculosis Infection --- United States, 2010 (http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5905a1.htm), for more information concerning test performance in low-prevalence populations and use in occupational screening.

Comment:

RESULT: NEGATIVE FOR NO FUNCTION ALLELES (GENOTYPE
TPMT*1/TPMT*1)

INTERPRETATION: Analysis of DNA indicates that this individual does not carry any of the TPMT no function alleles tested. This test cannot rule out the possibility that he or she is a carrier of one or more rare variants causing an intermediate (IM) or poor metabolizer (PM) phenotype.

Laboratory results and submitted clinical information reviewed by Bernard Joseph Ilagan,MD, MHA. DABMGG. CGMBS.

Thiopurine S-methyltransferase (TPMT) is an enzyme involved in the metabolism of drugs such as azathioprine, 6-mercaptopurine, and cisplatin. No function and decreased function alleles in the TPMT gene (NM 000367) cause a reduction of TPMT enzyme activity, which leads to thiopurine drug-related toxicity (myelosuppression) as well as cisplatin-induced ototoxicity.

This test detects the four most common no function alleles: TPMT*2 (c.238G>C, rs1800462), TPMT*3A (c.460G>A, rs1800460/c.719A>G, rs1142345), TPMT*3B (c.460G>A, rs1800460), and TPMT*3C (c.719A>G, rs1142345). In general, a combination of TPMT*1 and a no function allele would exhibit an intermediate metabolizer and a combination of two no function alleles would exhibit a poor metabolizer. Approximately 10% of the African-American and Caucasian populations are

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
intermediate metabolizers and 3.5% are poor metabolizers. Among East Asians, approximately 3.4% are intermediate metabolizers while 0.03% are poor metabolizers. The variants are detected by real-time PCR of the targeted regions of the TPMT gene. If none of the TPMT variants are detected for a chromosome, the reported allele will be TPMT*1, however, this result is only inferred. This test cannot rule out the presence of other alleles that could also cause an intermediate (IM) or poor metabolizer (PM) phenotype. Among Asians and Hispanics, no function variants in NUDT15 are a more common cause of thiopurine drug-related toxicity. This assay does not check for variants in the NUDT15 gene. Although rare, false positive or false negative results may occur. All results should be interpreted in the context of clinical findings, relevant history, and other laboratory data. Additional information regarding the significance of gene-drug interactions can be found in a number of places, including the package insert, FDA websites, the Clinical Pharmacogenetics Implementation Consortium (CPIC), as well as PharmGKB (http://www.pharmgkb.org) and the primary literature. Health care providers may also contact your local Quest Diagnostics' genetic counselor or call 1-866-GENEINFO (866-436-3463) for assistance with the interpretation of these results. This test was developed, and its analytical performance characteristics have been determined by Quest Diagnostics Nichols Institute San Juan Capistrano. It has not been cleared or approved by FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes. Reviewed and signed by Laboratory results and submitted clinical information reviewed by Bernard Joseph Ilagan,MD, MHA, DABMGG, CGMBS, Signed on 04/12/2023 at 15:24 Test Performed at: Quest Diagnostics Nichols Institute 33608 Ortega Highway San Juan Capistrano, CA 92675-2042 Director: I Maramica MD, PhD, MBA

CREATININE AND CALCULATED GLOMERULAR FILTRATION RATE (CREATININE W GFR, CALCULATED) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Creatinine	0.98	<=1.34 mg/dL			TPMG REGIONAL LABORATORY, MWS	
Estimated Glomerular Filtration Rate	>60	>=60 mL/min/1.73 m2			TPMG REGIONAL LABORATORY, MWS	
Comment: Estimated GFR (eGFR) helps us know how the kidneys are working. eGFR is based on the creatinine blood test result, age, sex, and body size. Monitoring eGFR over time helps us understand changes in kidney function. Actual kidney function may be better or worse than the estimated GFR because blood creatinine levels are affected by body make up, diet, hydration, genetics, and more. Multiple eGFR values are used to determine chronic kidney disease (CKD) stages, defined by the following ranges: eGFR 45 - 59 = Stage 3a eGFR 30 - 44 = Stage 3b eGFR 15 - 29 = Stage 4 eGFR under 15 = Stage 5 Values for eGFR before 05/25/2022 will appear in lab results under "Past results".

VITAMIN B12 (COBALAMIN) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Vitamin B12	318	>=200 pg/mL			TPMG REGIONAL LABORATORY, MWS	

Comment:
Samples should not be taken from patients receiving therapy with high biotin doses (i.e. > 5 mg/day) until at least 8 hours following the last biotin administration (falsely elevated results are possible). Performed on Roche Cobas e801; results from different methods should NOT be used interchangeably when serially monitoring patients.

Reference Ranges for Vitamin B12:

Normal: Greater than or equal to 200 pg/mL
Borderline: 200-300 pg/mL

VITAMIN D (VITAMIN D, 25-HYDROXY) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
VITAMIN D, 25-HYDROXY	11	20 - 79 ng/mL			TPMG REGIONAL LABORATORY, MWS	

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Comment: Reference ranges and interpretive guidelines represent clinical decision points for healthy adults. Definitive data is lacking for the pediatric age group. Sufficient range lower limit changed from 25 to 20 ng/mL on 06/04/2012.						
Interpretation of 25-OH Vitamin D Levels (ng/mL):						
Deficient		<12				
Insufficient		12-19				
Sufficient		20-79				
High		80-150				
Toxic		>150				
This test was developed and its performance characteristics determined by TPMG Regional Laboratory. It has not been cleared or approved by the FDA. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.

HEPATITIS B VIRUS SURFACE ANTIGEN (HEPATITIS B VIRUS SURFACE ANTIGEN (HBSAG)) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
Hep B surface AG	NEGATIVE				TPMG REGIONAL LABORATORY, BERKELEY	

Comment:
Used to determine acute, recent, or chronic hepatitis B infection status.

Samples should not be taken from patients receiving therapy with high biotin doses (>5 mg/day) until at least 8 hours following the last biotin administration. (Falsely low results are possible.)

Specimen (Source)	Anatomical Location / Laterality	Collection Method / Volume	Collection Time	Received Time

HEPATITIS A VIRUS ANTIBODY (HEPATITIS A VIRUS ANTIBODY (HAVAB), TOTAL) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
HEP A VIRUS AB	NEGATIVE				TPMG REGIONAL LABORATORY, BERKELEY	

Comment:
Hep A Total detects IgG and IgM antibodies and is used to determine immune status or history of prior infection. For evaluation of acute Hepatitis A infection order HepA IgM.

Samples should not be taken from patients receiving therapy with high biotin doses (>5 mg/day) until at least 8 hours following the last biotin administration. (Falsely low results are possible.)

HEPATITIS B VIRUS SURFACE ANTIBODY (HEPATITIS B VIRUS SURFACE ANTIBODY (HBSAB)) - Final result (04/05/2023 9:16 AM PDT)

Component	Value	Ref Range	Test Method	Analysis Time	Performed At	Pathologist Signature
HEP B VIRUS SURFACE ANTIBODY	NEGATIVE				TPMG REGIONAL LABORATORY, BERKELEY	
Comment: When the Hepatitis B surface antibody result is POSITIVE, this indicates a Hepatitis B surface antibody level of >=10 mIU/mL. Samples that are POSITIVE are considered protective for Hepatitis B immunity in accordance with CDC guidelines.

KAELEEN HOLBROOKS RN - 03/07/2024 11:31 AM PST

Formatting of this note might be different from the original.

Alexandru Turcanu is a 22 Y male patient here for skin tag removal around eyelids.

Last Information and Authorization form signed: 03/07/2024

All procedures have risks that may be unpredictable. No guarantees may be made as to the final outcome of this procedure.

The potential risks include but are not limited to:

A permanent visible scar will occur with any procedure.

Pain and infection may occur.

An area of numbness or discomfort may persist.

Some types of lesions may re-grow or persist even after correct removal.

Color changes in the skin may occur, either darker or lighter, at the site of a lesion that is removed.

Removal may warrant multiple treatments.

BART reviewed and consent form signed.

Photos taken after verbal authorization was obtained.

Hyfercated flat tags on low with 1.0 watts.

Verbal post care instructions discussed. Patient verbalized understanding.

NDA CO30 / prn

Pain and infection may occur.

An area of numbness or discomfort may persist.

Some types of lesions may re-grow or persist even after correct removal.

Color changes in the skin may occur, either darker or lighter, at the site of a lesion that is removed.

Removal may warrant multiple treatments.

BART reviewed and consent form signed.

Photos taken after verbal authorization was obtained.

Hyfercated flat tags on low with 2.0 watts.

Verbal post care instructions discussed. Patient verbalized understanding.

Your Kaiser Permanente Care Instructions

Dermatitis: Care Instructions

Overview

Dermatitis is the general name used for any rash or inflammation of the skin. Different kinds of dermatitis cause different kinds of rashes. Common causes of a rash include new medicines, plants (such as poison oak or poison ivy), heat, and stress. Certain illnesses can also cause a rash.

An allergic reaction to something that touches your skin, such as latex, nickel, or poison ivy, is called contact dermatitis. Contact dermatitis may also be caused by something that irritates the skin, such as bleach, a chemical, or soap. These types of rashes cannot be spread from person to person.

How long your rash will last depends on what caused it. Rashes may last a few days or months.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

Do not scratch the rash. Cut your nails short, and file them smooth. Or wear gloves if this helps keep you from scratching.

Hydrocortisone 1%, daily lotion after shower cerave, aveeno lotion

Wash the area with water only. Pat dry.

Put cold, wet cloths on the rash to reduce itching.

Keep cool, and stay out of the sun.

Leave the rash open to the air as much as possible.

If the rash itches, use hydrocortisone cream. Follow the directions on the label. Calamine lotion may help for plant rashes.

If itching affects your sleep, ask your doctor if you can take an antihistamine that might reduce itching and make you sleepy, such as diphenhydramine (Benadryl). Be safe with medicines. Read and follow all instructions on the label.

If your doctor prescribed a cream, use it as directed. If your doctor prescribed medicine, take it exactly as directed.

When should you call for help?

Call your doctor now or seek immediate medical care if:

You have symptoms of infection, such as:

Increased pain, swelling, warmth, or redness.

Red streaks leading from the area.

Pus draining from the area.

A fever.

You have joint pain along with the rash.

Watch closely for changes in your health, and be sure to contact your doctor if:

Your rash is changing or getting worse.

You are not getting better as expected.

Where can you learn more?

Go to <https://kp.org/health>

Enter F270 in the search box to learn more about "Dermatitis: Care Instructions."

OBJECTIVE:

Vital Signs:

Vitals:

02/01/24 0919

BP: 117/68

Pulse: 90

Temp: 98 °F (36.7 °C)

TempSrc: Temporal

Weight: 48.2 kg (106 lb 3.2 oz)

Height: 5' 10.5"

Physical Examination:

Physical Exam

Constitutional:

Appearance: Normal appearance.

Skin:

General: Skin is warm and dry.

Findings: Rash present. Rash is papular.

Neurological:

Mental Status: He is alert.

Sensory: Sensation is intact.

Motor: Motor function is intact.

Coordination: Coordination is intact.

Gait: Gait is intact.

ASSESSMENT & PLAN:

RASH

- likely dermatitis since pt does not moisturize and showers twice daily, less likely folliculitis as pt denies pain or pruritis. Recommended starting OTC low potency corticosteroid for tx along with applying lotion after shower, pt agreeable to plan
- reviewed supportive care and red flag sign and symptoms
- Potential side effects, cautions and risks were discussed with patient for medications and treatment options recommended. Patient expressed understanding and acceptance
- copy of rash home care instructions printed and given to pt along with discharge summary

Return to Clinic:

- Follow up with PCP as needed if symptoms does not improve

Diagnoses recorded for this visit were addressed and are stable unless otherwise indicated in this note.

Telephone Encounter - ROSANNA C H LIU MA - 01/09/2024 1:59 PM PST

Formatting of this note might be different from the original.

This category is for referrals that 1) have a definite diagnosis and 2) do not have a medical indication for treatment so that the treatment would be out of pocket to the patient. If either of these are not the case please use the code "Skin growth."

Please give the cosmetic condition/diagnosis that the patient would like treated. Please ask patient to send photos using .phototakinginstructions regional dot phrase too.

tiny skin tags on left upper eyelid

any cosmetic provider treating skin tags

Spoke with pt apt booked on 02/22/24 at 9:30 am confirmed.

Patient Instructions

FAITH REYES BOCOBO MD - 01/09/2024 6:44 PM PST

Formatting of this note might be different from the original.

Thank you for connecting virtually with me today.

Today we found that you have:

Rhinitis

Our plan is as follows:

1) You will need lab tests- please proceed to 2238 Geary 2nd Floor Lab or any Kaiser Permanente Laboratory

2) Medications

Fluticasone (Flonase) 1 spray(s) in each nostril 2x/day

Cetirizine (Zyrtec) 10 mg or Loratadine (Claritin) 10 mg or Fexofenadine (Allegra) 180 mg once daily as needed

Saline washes/irrigation/neti pot

3) I will contact you with the test results. Further recommendations after testing.

Please do not hesitate to call or contact me or the Allergy department for any concerns or questions.

Electronically signed by FAITH REYES BOCOBO MD at 01/09/2024 6:44 PM PST

ALLERGY CLINICAL TELEHEALTH NOTE:

CC rhinitis

I contacted patient and confirmed that I was speaking to the correct person.

Alexandru Turcanu or substitute decision-maker has provided verbal consent to participate in this video consult.

Patient expressed understanding and agreed to proceed with the video visit and treatment if necessary. Consent documented in visit navigator. Connection was successful.

HPI Alexandru Turcanu is a 22 Y male originally from Romania. > 5 years ago he had some asthma symptoms and was told that it was allergic based on + allergies tests to dust, plants and animals. HOwever since then he has not had nay asthma symptoms, no wheesing shortness of breath, shest tightness, etc. Main issue now is since moving to the US ~ 4-5 years ago has had sneezing, nasal congestion and typical rhinitis symptoms. Using only nasal decongestant and nothing else. Has not had any repeat allergy testing.

- Smoking status: Never

Vaping Use
• Vaping Use: Never used

E-Cigarettes/Vaping
Questions Responses
E-Cigarette/Vaping Use Never User

ENVIRONMENTAL:
No pets but anticipates puppy in 2 mos

PHYSICAL EXAMINATION:

PE deferred to discussion
DIAGNOSTIC INFORMATION:

Data Review: Reviewed lab results: no new pertinent lab results past 3 months

ASSESSMENT / PLAN:
we found that you have:
Rhinitis
Our plan is as follows:

- 1) You will need lab tests- please proceed to 2238 Geary 2nd Floor Lab or any Kaiser Permanente Laboratory
- 2) Medications
Fluticasone (Flonase) 1 spray(s) in each nostril 2x/day
Cetirizine (Zyrtec) 10 mg or Loratadine (Claritin) 10 mg or Fexofenadine (Allegra) 180 mg once daily as needed
Saline washes/irrigation/neti pot
- 3) I will contact you with the test results. Further recommendations after testing.

FOLLOW-UP: Contact provider As needed or sooner if these symptoms worsen or fail to improve as anticipated.

- Secure message sent to member for additional patient instructions.

- The diagnoses recorded for this visit were confirmed and considered in the current care of the patient. Unless otherwise indicated these conditions are stable with no significant changes reported. The patient should follow-up with the PCP or appropriate specialist as needed.

Your Kaiser Permanente Care Instructions

Back Stretches: Exercises

Introduction

Here are some examples of exercises for stretching your back. Start each exercise slowly. Ease off the exercise if you start to have pain.

Your doctor or physical therapist will tell you when you can start these exercises and which ones will work best for you.

How to do the exercises

Overhead stretch

Stand comfortably with your feet shoulder-width apart.

Looking straight ahead, raise both arms over your head and reach toward the ceiling. Do not allow your head to tilt back.

Hold for 15 to 30 seconds, then lower your arms to your sides.

Repeat 2 to 4 times.

Side stretch

Stand comfortably with your feet shoulder-width apart.

Raise one arm over your head, and then lean to the other side.

Slide your hand down your leg as you let the weight of your arm gently stretch your side muscles. Hold for 15 to 30 seconds.

Repeat 2 to 4 times on each side.

Press-up

Lie on your stomach, supporting your body with your forearms.

Press your elbows down into the floor to raise your upper back. As you do this, relax your stomach muscles and allow your back to arch without using your back muscles. As your press up, do not let your hips or pelvis come off the floor.

Hold for 15 to 30 seconds, then relax.

Repeat 2 to 4 times.

Relax and rest

Lie on your back with a rolled towel under your neck and a pillow under your knees. Extend your arms comfortably to your sides.

Relax and breathe normally.

Remain in this position for about 10 minutes.

If you can, do this 2 or 3 times each day.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

CC: SKIN PROBLEM

HPI: Alexandru Turcanu is a 22 Y male
Patient speaks English

Alexandru presents with c/o skin problem
Location: left upper eyelid
Quality: tiny skin tags
Context: he wants them removed

Also c/o sneezing and watery eyes, he wants allergy tests

Patient Active Problem List:
MITRAL VALVE DISORDER
IRRITABLE BOWEL SYNDROME
VITAMIN D DEFICIENCY

BP 98/71 | Pulse 98 | Temp 97 °F (36.1 °C) (Temporal) | Ht 5' 10.5" | Wt 48.6 kg (107 lb 3.2 oz) | BMI 15.16 kg/m²

Physical Exam
Constitutional:
General: He is not in acute distress.
Skin:
Findings: Lesion (tiny skin tags on left upper eyelid) present.

Assessment and Plan:
SKIN TAGS
Tiny ones on left upper eyelid, he wants them removed for cosmetic reason
- consult Cosmetic Dermatology

ALLERGIC RHINITIS
C/o sneezing and watery eyes, he wants allergy tests
- consult Allergy

ROUTINE ADULT HEALTH CHECK UP EXAM
Pt wants check up labs, he wants rechecking vitamin D level because it was low, reportedly he is taking vitamin D supplement, he declines STI tests
- VITAMIN D, 25-HYDROXY; Future
- LIPID PANEL, (CHOL, DHDL, TRIG, CALC LDL), FASTING; Future
- GLUCOSE, FASTING; Future

Follow up:
With PCP prn

Progress Notes - documented in this encounter

BRENDA V GEORGE LVN - 08/04/2023 9:19 AM PDT

Formatting of this note is different from the original.

EIGHT RIGHTS OF MEDICATION ADMINISTRATION:

- right patient (checked by verbally asking patient to state full name and d.o.b)
- right medication (checked by review vial against current open order, lot # and expiration date reviewed)
- right dose (checked by reviewing current open order against vial and what is drawn up)
- right route (given per order and manufacturer)
- right time (if applicable, checked by reviewing immunization interval and the last administration date)
- right reason (checked when giving medication)
- right documentation.Yes
- right response. Yes

Allergies verified

nkda

I gave the patient the following medication(s)/injection(s):

HPV IM

Pt tolerated well after the injection, no adverse reaction, stable upon leaving.

Orders conveyed through department-approved policies and procedures.

Immunization Orders Placed This Encounter

Procedures

- VACC HUMAN PAPILLOMAVIRUS, HPV9, NONVALENT, 2 OR 3 DOSE SCHED IM

Diagnoses:

No diagnosis found.

Progress Notes - documented in this encounter

ANDREW I-AN LU MD - 03/30/2023 11:05 AM PDT

Formatting of this note might be different from the original.
F/u ulcerative proctitis, 1 month ago "switched to different brand" rectal suppository. One episode rectal bleeding. Previously on 5ASA canasa. Now with dyspepsia abd pain diarrhea 8x.

Pt confirms initially used canasa as prescribed here. Pt able to obtain other "supplier" from romania.

labwork recommended last visit not finished. Pt will finish this and finish new advised stool cultures.

Pt will switch back to domestic prescribed canasa.

ABNL LABORATORY FINDING (primary encounter diagnosis)

Plan: BACTERIAL ENTERIC PATHOGEN PANEL (6 COMPONENTS), STOOL, PCR
CLOSTRIDIUM DIFFICILE GDH AG, TOXINS A, B W REFLEX TO PCR
PROTOZOA SMEAR AND GIARDIA BY EIA PANEL.
VIBRIO CULTURE, STOOL
MESALAMINE 1000 MG RECT SUPP - Unwrap and insert 1 Suppository rectally daily at bedtime

Electronically signed by ANDREW I-AN LU MD at 03/30/2023 11:25 AM PDT

Miscellaneous Notes - documented in this encounter

Staff Note - BECKY HUANG MA - 03/30/2023 10:47 AM PDT

Formatting of this note might be different from the original.
I left a message to the pt, the video appt with the doctor will be today at 11 am.

Clinical Telehealth Note

History of Present Illness

Alexandru Turcanu is a 21 Y male scheduled to address the following issues.

21M with past medical hisotry of IBS, diagnosed with Romania, currently on Mesalamine for 6 months with improvement. Has medcial records with him but currently not translated

Diagnosed in romania 9/22. Performed colonoscopy in romania - described distal 15cm proctitis. Started mesalamine suppository. Taking actively. Feels better.

Presenting symptoms rectal bleeding, general indigestion, abd pain. Midline below umbilicus.

"bubbling sound" in abdomen.

No associated other alarm symptoms reported including weight change, n/v, change BM, fever.

Etoh, tob, nsaid bland

FH: GI bland.

Patient Active Problem List:

MITRAL VALVE DISORDER

IRRITABLE BOWEL SYNDROME

No outpatient medications prior to visit.

No facility-administered medications prior to visit.

Objective

There were no vitals taken for this visit.

PE:

Oropharynx: clear

Appearance: normal

Cardiopulmonary: regular rate and rhythm, no murmurs

Chest: clear to auscultation

Abdomen: abdomen is soft without significant tenderness, masses, organomegaly or guarding.

Assessment & Plan

High suspicion for ulcerative proctitis responsive to 5ASA canasa.

Discussed topical therapy options including enema vs suppository, pt will remain on existing medication.

Discussed need for longterm consistent use of anti inflammatory medication to help prevent complications like flare and symptoms. System for refill through kp.org described, pt understands.

Will start with objective marker of state and inflammation next.

ABNL LABORATORY FINDING (primary encounter diagnosis)

- Plan: AST
- ALT
- BILIRUBIN, TOTAL AND DIRECT
- ALKALINE PHOSPHATASE
- PT
- CBC NO DIFFERENTIAL
- CREATININE W GFR, CALCULATED
- ALBUMIN
- ELECTROLYTE PANEL (NA, K, CL, CO2)
- CRP (C-REACTIVE PROTEIN)
- HEPATITIS A VIRUS ANTIBODY (HAVAB), TOTAL
- HEPATITIS B VIRUS SURFACE ANTIGEN (HBSAG)
- HEPATITIS B VIRUS CORE ANTIBODY (HBCAB), TOTAL
- HEPATITIS B VIRUS SURFACE ANTIBODY (HBSAB)
- HEPATITIS B VIRUS DNA, QUANTITATIVE
- VITAMIN B12 (COBALAMIN)
- VITAMIN D, 25-HYDROXY
- IRON AND TOTAL IRON BINDING CAPACITY
- FERRITIN
- GLUCOSE, FASTING
- LIPID PANEL, (CHOL, DHDL, TRIG, CALC LDL), FASTING
- CALPROTECTIN, STOOL
- GAMMA INTERFERON (TB), CD4 AND CD8 T-CELL RESPONSE
- THIOPURINE DRUG TOXICITY, TPMT, GENOTYPING

MITRAL VALVE DISORDER

IRRITABLE BOWEL SYNDROME

Additional notes:

Mitral Valve Disease

Asymptomatic, murmur heard on auscultation. Required yearly imaging by Cardiology in Romania. Referral placed to Kaiser Cardiology. Records in hand.

IBS

Diginosed 6 months ago while in Romania, currently on mesalamine with improved symptoms. Records in hand. Referral placed to Gastroenterology for follow up.

Patient Active Problem List

MITRAL VALVE DISORDER [I05.9]

IRRITABLE BOWEL SYNDROME [K58.9]

Resolved Hospital Problems

No resolved problems to display.

I have confirmed the presence of the above clinical diagnoses, which were considered in the current and ongoing care of the patient. At the time of this visit, the medical record indicates, and/or the patient states, that there are no changes in these conditions unless otherwise noted. As treatment warrants, the patient has been advised to follow up with his PCP or appropriate specialist.
